CROCS, INC. RAPIDLY SCALES BUSINESS WITH CONVERGED NETWORK SOLUTION FROM EXTREME NETWORKS AND SHORETEL

Converged network sustains growing business with expanding employees, offices and sales by delivering beneficial support for voice, business continuity and wireless LAN

SANTA CLARA, Calif.; Jan. 8, 2007 – Crocs, Inc. of Colorado has implemented a high-performance network from Extreme Networks, Inc. (Nasdaq: EXTR) and a scalable IP telephony solution from ShoreTel, a leading provider of IP telephony solutions. The network integration and optimization, completed by Evolve Technologies, is intended for mid-size network scalability and includes advanced call features with an integrated wireless LAN.

Crocs Inc. specializes in unique, lightweight, comfortable, fashionable and functional footwear and is a business that truly had burst its seams. Due to its growing popularity, the company required an expanded product line, new warehouses, and shipping programs for speedy assembly and delivery to global markets.

Previously, Crocs Inc. had a basic network formed around piecemeal, unmanaged switches that simply passed data from desk to server for Internet and office needs. Growing from tens to hundreds of employees and users, the inability of its network to perform traffic prioritization and a lack of switch support for IP telephony meant that further growth and cost savings were prohibitive. To design a voice platform and select its new network, Crocs, Inc. worked with Evolve Technologies of Boulder, Colo., a value-added reseller and communications systems integrator.

In selecting Extreme Networks'® mid-size network solution, Crocs received the benefits of a robust and scalable network that can support clear and consistent IP voice calls, provides easy management, and comes with availability and security features for business continuity. Crocs

complemented its Extreme Networks solution with an easy-to-manage IP telephony system and award-winning IP phones from ShoreTel. ShoreTel's VoIP phones, IP PBX switches, and software are designed for ease-of-use, management simplicity, and reliability. ShoreTel's IP phone system seamlessly scales to support Croc's rapid growth.

"Having high-performance network and convergence solutions that are highly available, feature-rich, and standards-based is genuinely helping our customers meet their toughest challenges," said Doug Hanson, CEO for Evolve Technologies. "We have been able to integrate ShoreTel and Extreme Networks very effectively as Crocs, Inc. expands and evolves its network infrastructure to meet its growth."

Croc's network, dispersed between four buildings on two sites, features Extreme Networks' powerful Summit® X450, 400, 300 and 200 fixed switching solutions. Summit switches feature redundant Gigabit connectivity, powerful management features with Power over Ethernet (PoE) management, and wireless LAN capabilities. Wireless LAN connectivity is supported in warehouses and an expansion to wireless from end-to-end and in branch locations is on the horizon.

"ShoreTel is a perfect fit for fast-growth companies like Crocs," said Steve Timmerman, vice president of marketing at ShoreTel. "ShoreTel phone systems are quick to install, easy to use, easy to manage, and deliver the highest levels of reliability on the market. Companies like Crocs get advanced IP telephony capabilities both quickly and easily."

"Extreme Networks is squarely focused on helping growth organizations meet their advanced technology needs with products, services and features that are tailored exactly to them," said Scott Lucas, senior director of product marketing for Extreme Networks. "This is another example of how we can assist mid-market customers with their very diverse needs."

"Working with Crocs Inc., along with our channel partner Evolve Technologies and our business partner ShoreTel, clearly demonstrates how Extreme Networks can provide an effective network solution that helps a business expand and accelerate its use of advanced network infrastructure and IP convergence," said Dan Sibille, senior director for North American Channels at Extreme Networks. "We are very pleased with our role and the shared partner collaboration resulting in this successful customer implementation."

Evolve Technologies

Evolve Technologies has been providing "Best of Breed" communication solutions to our

Enterprise customers since 1995. Whether your organization is large or small; campus, regional or global technology has led us to the next generation of convergence in a world of ubiquitous environments. As our customers needs grow in this changing time of IP Telephony, Data and WIFI infrastructures; Evolve Technologies is able to provide and integrate world class solutions through our valued partners; ShoreTel and Extreme Networks to help our customers benefit through the power of technology and convergence.

Extreme Networks, Inc.

Extreme Networks designs, builds, and installs Ethernet infrastructure solutions that solve the toughest business communications challenges. Our commitment to open networking sets us apart from the alternatives by delivering meaningful insight and unprecedented control to applications and services. We believe openness is the best foundation for growth, freedom, flexibility, and choice. We focus on enterprises and service providers who demand high performance, converged networks that support voice, video and data, over a wired and wireless infrastructure.
